

## SAURY CUVES & CASKS

- Custom made 1000-7000L
- 4 year seasoned
- TCA analysis by EXACT laboratory

Located in Charente, outside of Cognac and with over 30 years dedicated solely to the design and manufacture of large oak vessels, our cooerage is well experienced in the production of wooden tanks of up to 500hL in capacity. For shipment to ANZ we offer sizes from 10-70hL, fully assembled for immediate use.

Purchased mainly from state forests managed by the ONF (Office National des Forêts), all our oak is certified as PEFC. After the trees are harvested, we cut long planks of 54mm and 65mm thickness which are then naturally open air dried for a minimum of 4 years.

Having discussed the exact requirements of your project (end use, choice of accessories, site constraints) our in-house design team will make a drawing following the complete specifications in conjunction with our artisan coopers. A clear description, detailed drawing and a quote are all provided for you to sign before we commence production.

Once approved, the precise construction work begins.

### Wood Specifications

#### Type

**French Oak** (*Quercus sessilis*, *Quercus robur*).

#### Origin

Selection and assemblage from centre of France forests.

#### Staves

54mm and 65mm depending on the size of the vessel.

#### Seasoning

Open air seasoning for minimum 4 years.

### Toasting Specifications

#### Toast

Traditional wood fire.

#### Toasting

Medium.

#### Finish

Coopers varnish.

#### Hoops

Galvanised finish or black.

SAURY CUVES				
Capacity	Litres	Height (m)	Upper Diameter (m)	Lower Diameter (m)
10 hL	1000	1.26	1.13	1.26
20 hL	2000	1.55	1.40	1.55
